Attachments: TX5.zip; TXSI2365.FIL

It looks like there were a couple additional rows with various lengths that were throwing it off. Please try this one, I zipped it up with your files and it loaded in preprod successfully.

Thanks,
Chris Muir

Good morning Chris,

I replaced the file but I'm still getting the same errors. Should I be doing something to the SI1 file?

Thanks,
Sontina

Hi Sontina, please try this version of SI2. There was an extra line break on line 2666, and a couple characters out of place on the lines around it that were shifting the data. I loaded it into our development environment and it seemed to work.

Thanks,
Chris Muir

Chris,

This seems to just be getting worse. I have no idea what I'm doing wrong. I've gone into the SI2 flat file repeatedly and edited it but it's like I haven't made any changes at all. I get the same errors over and over and I've actually managed to add two. I'm calling it for the night, but I'll log on tomorrow for a couple hours to see if I can get it to pass edit checks. Please let me know if you have any more advice for me.

Subject: RE: TX Data Upload (2 Errors)

Hi Sontina, I believe the issue is lines 2677 and 2665 in SI2 file exceed the maximum length, therefore the validation rule is failing because it does not see both a valid owner and operator record for those two sites. It appears to just all be whitespace, so if that gets trimmed down so that the whole line is under the max 1380 chars it should pass.

Thanks,
Chris Muir

Subject: TX Data Upload (2 Errors)
Importance: High

Hi Chris,

I've been up working on these for over 24 hrs and I finally got it from 832 down to two errors. For the life of me I can't figure out what the problem is. The errors read as this:

12/30/2020 02:43PM	Error	[SI1] Line:1334 Key: TXF98231 0493. The required owner dat a in SI2 is missing. See SI1 -510.
12/30/2020 02:43PM	Error	[SI1] Line:1335 Key: TXF98231 0449. The required owner dat a in SI2 is missing. See SI1 -510.

I have manipulated these flat files every way that I know how and I'm just not seeing what the issue, so I'm hoping you can help me out. This is the only thing keeping us from declaring Texas's data as final.

Please let me know if you can see what I apparently can't.

Thanks,
Sontina

Dear Sontina S Powell <powell.sontina@epa.gov>,

Your upload request for TX has now finished processing with a status of Failed. You may view the details by going to the BR Load Utility.

Thank you!
